

silencer™

The ultimate personal protection for shot blasting

The Silencer® system is the only equipment on the market that gives you sufficient noise protection.

- CE approved EN 14594 Class 4
- Noise reduction of 41 dBA
- Integrated hearing protectors
- Integrated hard hat
- Airflow safety indicator
- High user comfort
- Low weight
- Rubber coated
- Adjustable head band

Increased comfort and noise reduction equals higher productivity!

"With double hearing protection (earplugs - hearing protectors) one will be protected against harmful noise levels in most situations."
Sinus AS, June 21, 2002

Silencer® personal protective equipment has been developed in close cooperation with Norwegian shot blasting companies. The aim for the project was to develop a product that satisfied the very stringent legal requirements in Europe for noise reduction, while still being user-friendly and comfortable. Repeated testing has shown that both goals have been attained. The Silencer® is the ultimate in personal protective gear for shot blasting.

Precisely adjustable airflow regulator

Safe and reliable visor locking

The ultimate personal protection for shot blasting

Shotblasting is a very heavy, extremely noisy job. Most shotblasters have to quit work early in their life and some suffer bad hearing damage at later age. The better the worker is protected, the more comfortably he feels, the more productivity is to be expected. The unique Silencer Shotblasting protection system, has been developed to offer the best possible protection for the extreme conditions shot blasters have to work in.

Silencer is extremely comfortable and is the only available equipment that offers the necessary level of noise reduction.
