

## Hydro-blaster Accessories

### Aussie Turbo Master Turbo Lance

The Aussie Turbo Master turbo lance increases the effectiveness of the hydro-blaster by using the water's velocity to spin a pencil jet of water at high speed. The effective working pressure of the Aussie Raptor with a turbo fitted is calculated to be 12,000 psi.

### Aussie Grit Blast Kit

Fit an Aussie Grit blast lance and the water pressure combined with the grit increases the abrasive power of the water.

Also available ... high pressure unloaders, guns, lances, hose all rated to 500 BAR.

# Aussie Raptor Hydro-blaster .... 500 BAR power

## The Aussie Raptor ... the world's most cost effective hydro blaster

The Aussie hydro blaster is a production line machine built tough for shipyards or contractors involved in a wide range of hydro blasting tasks that include anti fouling of ocean going vessels, structural steel paint preparation, concrete demolition and trenchless excavation.

With 500 Bar pump pressure, a whopping 7,300 psi of cleaning power, the Raptor can cut through concrete, strip paint and rust or even be used as a very effective high pressure industrial drain cleaner.

Designed for tough applications in shipyards, mines, demolition or industrial tasks, the Aussie Raptor is a great combination of high pressure capability, simple low maintenance but user friendly design in a compact cost effective package.

**Options available: Honda 24HP petrol version,  
20HP electric drive,  
Skid or trailer mounted versions**

- 7300 psi Udor triplex piston pump with stainless steel pump head with a large oil filled crank case for cool running.
- Flow only 12 lpm ... water efficient.
- Heavy duty galvanised roll frame with anti-vibration dampeners and big steel pneumatic wheels.
- Powerful 20HP Hatz air cooled industrial diesel engine with electric start and low oil engine protection.
- Large control panel with easy access.
- Integrated lifting bar and tie down points for securing the hydro-blaster during transit.
- Large, serviceable water filter to protect pump and system for longer machine life.
- ASP (Aussie Safety Protection) kits including thermal dump valve to protect machine from extended by-pass running and safety valve to protect operator & machine from pressure spikes.
- 10 metres double wire braid 1/4" high pressure hose with quick screw coupling to pump.
- Stainless steel single lance & gun rated to 8,000 psi (quick screw coupling between hose and gun).
