

THE CLEARBLAST 150 WET ABRASIVE BLASTER FIGHTS CORROSION AND RESTORES BEAUTY

DRIVE YOUR OPERATIONS COSTS DOWN AND MAXIMISE
YOUR PROFITS EVERYTIME YOU PULL THE TRIGGER

When it comes to getting rid of corrosion, more traditional blasting methods rely on a substantial amount of abrasive to get the profile you are aiming for. The Clearblast 150 Wet Abrasive Blaster has been designed so that you can drastically reduce the amount of abrasive required and experience efficiency like never before.

Thanks to a team of industry experts in the field of wet abrasive blasting for over a decade, the Clearblast 150 expels only 11 Litres of water and approximately 23Kg of Abrasive per hour (around 25% of what other wet abrasive blasters use) - your containment needs and residual mess are therefore kept to a minimum.

The annual operating cost for the Clearblast 150, including the purchasing cost of the Unit, leaves competitors behind.

While the cost of one of our units signifies a larger investment compared with other rival units, you will quickly recoup that extra cost as the year progresses.

For many companies, we can appreciate that moving over to a Clearblast Wet Abrasive Blaster represents a significant investment. For this reason, we have made some financing options available†.

- ① Centralised Hose Connections
- ② Locking Casters
- ③ 4-Point Lifting Handles
- ④ Powder Coated Steel Frame
- ⑤ Run-Flat Tyres
- ⑥ Storage Lid and Water Hose
- ⑦ Simple Pneumatic Controls
- ⑧ Lifting Fork Pockets

Technical Specifications
