

**CLEMCO**  
The Performance  
System

**TECHNICAL DATA SHEET**

*Note: For safe, efficient blasting, read and follow the owner's manual and seek training for everyone who will use this equipment.*

**Traditional Heavy-Duty Blast Suit**

**Purpose**

To protect the blast operator from the impact of rebounding abrasive and provide ease of movement

**Advantages**

- Rugged leather panels protect arms and legs, while durable cotton back allows suit to breathe enhancing comfort.
- Straps at cuffs adjust to fit — help keep out dust and abrasive
- Lighter weight than all-leather or all-rubber suits
- Optional gauntlet gloves protect hands and wrists

**Seasonal Lightweight Blast Suit**

**Purpose**

The Clemco seasonal blast suit protects the operator from the impact of rebounding abrasive during warm weather or when blasting indoors. The suit is a cost-effective alternative to a heavy-duty suit for intermittent or short-term blasting, and for non-blast personnel working at the blast site.

**Advantages**

- Weighs less and costs less than Clemco's heavy-duty blast suit.
- Nylon and cotton construction is easily machine washable.
- Reinforced knee panels for longer wear.
- Discarding the lightweight suit after a toxic dust job is more economical.
- For rental outlets, the low-cost suit makes it possible to stock suits in sizes to fit most customers.
- Available in a broad range of sizes from small up to 4XL.

**Description**

Comfortable outer clothing for abrasive blast operators and for non-blast personnel working at the blast site, for protection from abrasive rebound.
