

Soda Blast Machine

SS4

A mild abrasive solution for precision work

- Will not warp or pit large metal panels such as bonnets, doors or roofing
- Will not damage glass, bearings, seals, rubbers, electrics, pneumatics and hydraulics
- Remove a single layer of paint
- Remove bitumen from glass and metal
- Remove baked on carbon and grease from food equipment
- Restore aviation engine frames, wings and other parts
- Remove paint and varnish from wood
- Remove concrete from glass and metal
- Remove grease and oil from engine and hydraulic parts
- Great for crack detection on parts and structural joints

Soda Blasting: The Environmentally Friendly Alternative

- Great for delicate jobs
- Efficient user-friendly operation
- Reliable, low maintenance
- Australian design and manufacture
- For Workshop to Heavy Industrial Use
- Ultra Efficient Media Usage

Specifications

Soda Capacity	90kg
Includes	<ul style="list-style-type: none"> • Fine screen and lid • STX Pneumatic remote control handle
Hose Length	10m 3/4" hose length
Minimum CFM Rating	75cfm with Number 3 Nozzle @ 80 psi
Nozzle Range	Number 3 or 4 Venturi style nozzles
Pressure Rating	Maximum 125psi
Noise Rating	96 Decibels
Dimensions	Height: 1650mm Width: 750mm Depth: 850mm
Weight	190kg
